must have something that folks just won't do without!

TYWO months ago, in the public print, we said I that this looks like Buick's biggest year-and we weren't fooling.

But what has happened - and continues to happen - is almost beyond belief.

People buy up these stunning new Buicks practically as fast as we get them from the factory. Buick production - already revised upward several times -keeps forging ahead to new highs every month to meet the mounting demand.

And Buick sales keep soaring higher and higher and higher - outstripping by far the phenomenal success of last year - the success that moved Buick into the "Big Three' of America's best sellers.

What is it about the '55 Buicks that folks by the

hundreds of thousands just won't do without? It's many things.

It's styling that's boldly distinctive and fresh as tomorrow. It's beauty of line and beauty of interior décor. It's a ride that's level, firm and steady. It's a new sweetness of handling. It's great powerwalloping new V8 power of record might.

But above all, it's a new kind of performance, from a new kind of automatic transmission that was born of flight thinking.

It's Variable Pitch Dynaflow*-engineered from the principle of the modern plane's switch-pitch propeller-and what it brings you in the way of pure thrill, mere words can't describe.

"We must have more recreational facilities," Goddard said, pointing to a 100 per cent increase in thier use between the 1952-54 biennium and the two previous years. During the last two years there were more than 131/2 million visitors to the state's recreational facilities.

Dr. Goddard urged legislative passage of a bill now before the House to give his department five million dollars every two yearsfrom revenue produced by state forest land. The money would come from royalties turned over to the state for gas taken from state property. At present all such revenue goes into the state's General Fund.
